

# Job application - Jr/Sr Full-stack JavaScript, Visily:

**Dear Trinh Thi Xuan Ngoc, HR Manager, Human Resources Department, KMS Technology.**

Desire to get a job:

Through the search in ITViec, one of the outstanding results for 'JavaScript Full Stack' is ' Jr/Sr Full-stack JavaScript, Visily' job of your company. The 'Full Stack' keywords and job description let me know that this is a suitable job for me.

Professional capacity, personal experience to meet job requirements:

The time when writing software products for projects including KidsPlaza App, and Rino App increase my experience in building complex software products.

Many HTML, CSS, and JavaScript projects include Thien Ha Book, Ignite Shop, TCM Book and more. Because Javascript is my favorite language, thereby its hot frameworks like TypeScript, Angular, React, React Native, and NodeJS are what attracted to me.

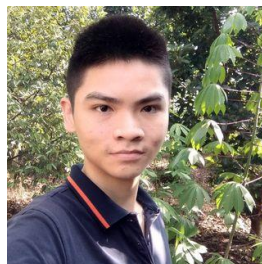

At the start, Dart and its framework - Flutter is required for Rino Project. Thanks to my fast learning and passion for picking up new technologies, Dart become my favorite language after JavaScript.

Because clean code saves my time to maintain and optimize code and creating good products is my target. So researching the best way to solve a solution with coding is my routine.

Communication skills and solving problems for projects also become my skills after working on many projects.

Suggest reply:

If you would like to schedule an interview or otherwise discuss my interest in this position, please call me at 0332340012 I will be available at your convenience.
